WWW github.com/berkayw

A driven and enthusiastic game developer with a strong passion for creating memorable gaming experiences.

Education

Bachelor's Degree: Computer Engineering

Istanbul Gedik University 2020-2024

3.58 GPA

Work Experience

Game Developer Intern

The Game Circle / July-September 2024

Designed and developed a multiplayer game using Unity & Photon, built with WebGL and optimized for PC & mobile. Explore more details about "Crystal Wars". [🔗](#)

Game Developer

Freelance / November 2024 - Present

Working on various Unity projects focused on gameplay mechanics, game systems, and multiplayer integrations. Continuously improving development skills while expanding my portfolio with building prototypes.

Skills

Familiar with Unity game engine and its fundamental concepts.

Experienced in multiplayer networking using Mirror, Photon, NGO, Steamworks (FacePunch), and UGS (Multiplay, Relay, Lobby).

Experience with OOP principles and design patterns to build modular and scalable code structures in C#, Java, and C++.

Knowledge of version control systems such as Git.

Solid understanding of math and physics relevant to game development.

Fast learner, quick to grasp new concepts and adapt to evolving technologies.

Projects

Unity Multiplayer [↗](#)

A fully integrated multiplayer Steam game template using Unity Mirror and Steamworks (FizzyFacePunch). Easily create or join lobbies, invite Steam friends, and enjoy secure, peer-to-peer gameplay via Steam Relay for low-latency, NAT-punching-free connections.

Shadow Of Sea [↗](#)

Pirate themed 3D TPS Action RPG developed in Unity. It features movement system, combat system, finite state machine, animations, enemy AI, treasure hunting, audiovisual effects, and polished UI. Developed this game as my graduation project at school.

Underworld Adventures [↗](#)

Unity game project with 2.5D top-down gameplay, room-based dungeons, boss rooms, advanced enemy AI, audiovisual effects, and polished UI.

FPS Movement [↗](#)

Physics-based FPS movement system inspired by games like Counter-Strike (bhoping, surfing) and Titanfall (wall running, sliding).

2D/3D Hybrid Platformer [↗](#)

Platformer game that integrates 3D depth with 2D gameplay developed in Unreal Engine 5. Offering a visually dynamic and engaging experience.

Blue Boy Adventure [↗](#)

Java-based 2D Action RPG with various combats, merchant, day-night cycle, dungeon puzzles, boss encounter, save/load, dialogues, inventory, map/minimap, and audiovisual effects.
